tickets

PK	ticket_id	SERIAL
FK	movie_id	INTEGER
	tix_price	NUMERIC 5,2
Key	showtime	INTEGER

customers

PK	customer_id	SERIAL
FK	ticket_id	INTEGER
FK	con_id	INTEGER

movies

PK	movie_id	SERIAL
Key	name	VARCHAR(50)
Key	rating	VARCHAR(20)

consessions

PK	con_id	SERIAL
Key	item_name	VARCHAR(50)
Key	con_price	NUMERIC 5,2

1 customer could buy multilple tickets but each ticket will only be
bought by one customer.
a movie id could be on multiple tickets but each ticket will have only
one movie.
consessions should be multiple both ways because each customer
could have many consessions and each consession could be bought
by many customers. (I can't seem to find a way to change it in the
diagram)
